TOP TIPS

HOW TO BE A SUCCESSFUL ONLINE LEARNER
GET ORGANIZED

Make time to review your syllabus early and create a quiet place for you to focus on your studies.
STAY ENGAGED AND ACTIVE

Through communication and connection, you can find support and relationships to make the most out of your education.
PRACTICE TIME MANAGEMENT

A weekly schedule can help to create a snapshot view of what is due and when. Students should also take time to reflect and recharge while self-pacing their studies.
While you won't be on campus, there are still many resources available online to distance learners.
